

AN INTRODUCTION TO BUILDING SAFETY MANAGEMENT WORKSHOP

- DURATION: 5 HOURS

WHO IS IT FOR

This workshop, delivered by sector leading practitioners, will be of interest to anyone wanting to understand more about the requirements of the Building Safety Act and the duties of the Accountable Person. The Building Safety Act and the Fire Safety Act were introduced in the wake of the Grenfell Tower disaster, with the aim of making buildings safer and more resilient to fires. The Act requires building owners and managers to take practical steps to ensure the safety of their tenants, including carrying out regular fire risk assessments, installing adequate fire safety measures, and having a fire safety management plan in place. The Act will have a significant impact on fire safety in the UK and will help to ensure that buildings are safer for tenants in the future.

Housing LMS is running a one-day Introduction to Building Safety Management to give an overview of how the legislation will impact the industry at a practical level.

AGENDA

10:30 - 10:45

Introduction The changing landscape of Building Safety

10:45 - 12:15
